**Real Operational  
Rig**

Availability

**Limited Spots**

There's a moment in every sales conversation when your prospect decides whether you're an insider or an outsider. Real Rig Films puts you on the right side of that line. OGGN produces live-action brand video shot on a real, operational rig site. Not stock footage. Not a rented set. The actual iron.

## WHO THIS IS FOR

Your product solves real problems. Your service delivers real value. Now you have to prove it to buyers who've heard every pitch from every outsider who's never set foot on a rig. Real Rig Films gives you that proof.

## WHAT WE PRODUCE

Every Real Rig Films project starts with a conversation about your business objective, not a menu of deliverables. What we produce depends on what you want to accomplish. Our projects typically take one of three forms, each designed for a specific kind of impact.

### Build credibility and authority

Your people, on camera, in a real operational environment. Positioned as industry insiders. Distributed with OGGN branding and reach. Creator-style content that borrows credibility from the environment and the network behind it.

### Tell a real-world value story

A documentary-style piece showing your solution in context: your people engaging with the environment, the problem, the work. Cinema verite style, crafted to feel candid and not staged. The kind of storytelling that makes a prospect lean in rather than scroll past.

### Make a cinematic statement

A film, not a video. Built from the ground up with a story worth telling. Brand filmmaking at its highest level, the kind of content that anchors a campaign, a trade show, or a product launch. Think less "corporate video," more proof of vision.

## THE OGGN ADVANTAGE

- **Access most production companies can't get.** OGGN has spent 25+ years building relationships in this industry. That means access to real operational environments that are simply off-limits to outside crews.
- **Built-in distribution to millions.** Your video doesn't just get made. It gets seen by the right people, through a network with millions of listeners who actually work in oil and gas.
- **Industry credibility baked in.** OGGN branding on your content signals to every viewer that you belong in this industry. That's not something a production company without our relationships can give you.

## PRICING AND AVAILABILITY

### PROJECT RANGE

**\$15,000 – \$50,000**

We don't sell packages. Every project is scoped based on your business objective and what your buyers need to see.

Limited availability

### SPOTS PER YEAR

**Small Number**

Rig access is rare. We take on a limited number of productions each year to protect quality and access.

**First conversation determines fit**

## Ready to shoot on the real iron?

Spots are limited. Start with a conversation.
